OIL GAS & MINING

Attention: Wayne Hedberg

Reference: Wildlife Impact Summary - September 1992

Dear Mr. Hedberg:

We have one wildlife mortality to report during the month of September. On September 15, 1992, at approximately 1:00 a.m. our personnel making their hourly sump inspections found a yearling doe in the sump of pad #1.

Upon investigation, I was informed by plant personnel that we have had a few deer feeding at night on vegetation growing on pad 1 for some time. Wildlife cannons had been used in an attempt to keep the deer away with little success. We have since the incident, removed most of the vegetation from the area which attracted the deer. In visiting with plant personnel this past week, they have not seen deer on the pad recently. Apparently our efforts to remove the food source is working.

Sincerely,

TENNECO MINERALS COMPANY
